Mall of America® has always been committed to green design. Efforts are made 365 days a year to reduce waste and improve efficiencies in its operation.

- **30,000 live plants** and **400 live trees** that act as natural air purifiers
- Recycles more than **60 percent of our waste**, which is an average of **32,000 tons per year**.
- Does not use a central heating system—even in January when the average Minnesota high temperature is 22 degrees Fahrenheit. Instead, the comfortable **70 degrees Fahrenheit** temperature is maintained by:
  - 1.2 miles of skylights for passive solar energy
  - Residual heat from light fixtures
  - Body heat from more than 40 million annual visitors
- Recycles more than 2,400 tons of food waste to local hog farms, which equates to more than a million hog meals annually.
- Releases thousands of ladybugs instead of using pesticides on live plants.
- Offers electric vehicle charging stations to service owners of electric cars, bikes and scooters.
- In 2011, installed more than 5,400 LED bulbs in parking ramps, spanning more than 2.2 million square feet and reducing energy costs by two thirds.
